

PRODUCT SPECIFICATION · LIFEPAK MAP BAG

Pak Choi

Brassica rapa subsp. chinensis

PRODUCT DETAILS

Product	Lifepack MA-MH (Modified Atmosphere / Modified Humidity) pak choi MAP bag. MAP maintains high humidity and prolongs senescence, thus keeping the product fresher and firmer for longer.
Produce type	Leafy brassica (non-heading), harvested by leaf size
Ethylene	Production None · sensitivity High (UC Davis Postharvest)
Suitable for	Organic & conventional pak choi (inert film — no organic certification needed)
Background	Pak choi is similar to cabbage but does not form a head, and is harvested while the leaves are a manageable size, before they toughen and begin to yellow. It produces little ethylene of its own but is highly sensitive to it, so control is essential for shelf life.
