Pea

Pisum sativum

PRODUCT DETAILS

Product	Lifepack MA-MH (Modified Atmosphere / Modified Humidity) pea MAP bag. MAP maintains high humidity and prolongs senescence, thus keeping the product fresher and firmer for longer.
Produce type	Fruiting vegetable (garden/snap/snow pea), harvested immature with fleshy pod and partially developed seed
Ethylene	Production Low · sensitivity Moderate (published postharvest data)
Suitable for	Organic & conventional pea (inert film — no organic certification needed)
Background	Pea is picked while the pod is immature, bright green and fleshy, with seed only partially to mid-developed; over-mature pods lose tenderness and turn fibrous and stringy. It is highly prone to moisture loss.
